# Abstract

This template allows you to generate a Thesis in which the first two pages respect the guidelines of the PhD program.

The format allows to store different papers in different Tex files, including potential multiple Annexes. When using this, remember not to alter the folders structure: for example, put the figures in the "Figures" folder and call the figures from that folder, add new chapters in the "Chapters" folder, store the bibliography in the same folder as the "Template Latex" file.

If you are downloading this because you are close to submitting your thesis, congratulations!!

If you are downloading this because you are about to start writing your thesis, good luck!!
